SKU P649
330 Pint Commercial Dehumidifier
For Areas Up To 2,000 sq. ft.

The Namco Scooter Carpet Extractor and Wet-Vac is a powerful, versatile, and durable machine. The aircraft grade aluminum construction, 2 vacuum motors, 120 psi solution pump, and non-flat wheels allow you to tackle any job. Each machine comes equipped with a stainless steel 12-inch Floor Wand, 50 feet of solution hose, and 50 feet of vacuum hose, allowing for maximum square foot coverage. Its built-in dump valve releases the dirty water into the toilet, so you never have to carry dirty water again. Use this machine to keep your carpets looking new and to remove any water caused by a flood, overflow, or broken pipe.

Namco industrial grade dehumidifiers feature a digital display showing the humidity level. Use this display to set the desired humidity (42% is ideal), and to view the digital hour meter. The automatic pump out allows for the unit to run continuously without any downtime. This product is a must have for any property to quickly remove excess moisture caused by flooding.

SKU 352049
